August 17, 2020

Dear Families,

We hope you are safe and healthy, and finding some rest and relaxation this summer. As we are approaching the start of the 2020-21 school year, we want to share some important new information with you about health and safety protocols at Story Place Preschool, Inc—and every school—for the upcoming year. All schools are preparing for blended learning, during which students learn in-person in school buildings for part of the week, and continue learning remotely from home on the other days. However, any family can choose 100% remote learning for any reason. If your preference is 100% remote learning, we ask that you let us know by this Friday, August 21, so that we have enough time to plan.

In this letter you will find:

- **Criteria to Open Schools and Keep them Open**
- **What Happens if Someone Gets Sick: New Information on COVID-19 Testing and Tracing in Schools**
- **Overall Health and Safety Protocols**

Criteria to Open Schools and Keep them Open

While we continue to carefully monitor a constantly changing health landscape, one thing remains steadfast: our commitment to the health and safety of our students, teachers, and staff. This priority is the foundation of all of our policies moving into September. On August 7, the Governor announced that schools are able to open in September. In order to remain open, on a weekly average, regions must see fewer than 3% of all COVID-19 tests come back positive. Additionally, if 3% or more of New Yorkers who are tested for COVID-19 are found to have the virus after we open, school buildings will close again, and 100% of learning will be remote for every student. If staff and students aren't healthy, they can't teach and learn, and we are doing all we can to ensure that schools remain safe and healthy for learning.

What Happens if Someone Gets Sick: New Information on COVID-19 Testing and Tracing in Schools

In close collaboration with our expert colleagues at the NYS Department of Health, we have developed strict protocols that address prevention, precaution, and response to one or more of our students or employees having a confirmed case of COVID-19. It's important to know that a "confirmed case" means that a parent or guardian, student, or staff member submits a positive test result from a healthcare provider or laboratory—like a County-run testing site, a private doctor, or an urgent care center—to the school.

Our protocols to keep school communities healthy include:

- **Prevention:** Starting with the first day of the 2020-21 school year, if a student or staff member is feeling sick, they are required to stay home. Additionally, if their symptoms are consistent with COVID-19, they will be required to get tested.
- **Feeling Sick in School:** If a student begins experiencing symptoms in school, they will be isolated and monitored by a school staff member until they are picked up by their parent or guardian. Staff members who become symptomatic at school must notify administration and immediately leave the building.
- **Testing:** Any staff member that wishes to get tested prior to the start of school are able to do so at any local testing site (visit coronavirus.health.ny.gov/covid-19-testing), free of charge. Additionally, any student or staff member that presents with signs and symptoms of illness will be required to get tested and will be unable to return to school until a negative test result has been achieved.
- **Tracing:** In the event of a confirmed COVID-19 case in the school, Story Place Preschool, Inc, NYS Dept. of Health, and the Rensselaer County Dept. of Health will investigate to determine close contacts within the school. All students and teachers in the classroom with the confirmed case are assumed close contacts and will be instructed to self-quarantine for 14 days since their last exposure to that case.

If there's more than one case in the school, and it's not in the same classroom, learning will continue remotely and the school building will close for at least 24 hours while NYS Dept. of Health and Rensselaer County Dept. of Health investigate. Depending on the outcome of the investigation, affected classrooms or the whole building will remain closed for 14 days for quarantine.

Students will continue their learning remotely during any necessary quarantine periods.

- **Remote Learning:** Remote learning opportunities for students will include a greater emphasis on synchronous instruction, with teachers finding ways to provide live instruction and recorded lessons to students. While recording of live lessons is still essential for students unable to attend at a scheduled time, teachers will ensure that their students are directly engaged with them and their class peers in experiential learning on a regular basis. To ensure high-quality remote learning experiences, we will standardize the use of a single online learning platform, to the extent possible, and develop a common, coordinated set of guidelines for teachers to follow when using the platform with students.
- **Communication:** Whether symptoms begin at home or in school, there will be a clear flow of information to facilitate fast action and prevent spread. If a COVID-19 case is confirmed, Story Place Preschool, Inc. will communicate to all families and students at school.

Overall Health and Safety Protocols

Testing and Tracing are part of several strict health guidelines designed to keep our school community healthy. Here are the key things that you and your family should know about NYSED health and safety practices, policies, and protocols as we re-open our school buildings in September:

- At all times, students and staff must wear face coverings protecting their nose and mouth while at school. Exceptions will be made for children who can't wear a face covering for medical reasons, and for younger children who aren't developmentally able to wear a face covering.
- Students and staff must maintain six feet of physical distancing throughout the school day, anywhere on school grounds and to and from school.
- Schools will be cleaned throughout the day and disinfected each night, with special attention to high-touch areas.
- Face coverings, hand sanitizer, and cleaning supplies will be readily available in every room throughout the school.
- Story Place Preschool, Inc. will have a school-based team ready to respond in the event that there is a health concern in our school.
- Story Place Preschool, Inc. will have a designated isolation room for use in the event that a student becomes ill during the school day.

For more details on these and other policies, please visit www.storyplacepreschool.com and click "School Reopening Plan" for additional information and all the latest updates.

We are approaching reopening by centering health and safety and basing our policies on the expertise of health professionals—period.

As parents and educators together, we know what it feels like to want the best possible education for your child while ensuring the health and safety of your entire family. We have collectively learned a lot since March—both about the virus, and about our ability to react and respond to it in real time. That's why we won't settle for anything but the strictest and most rigorous processes for coming back to school.

We will send more information in the coming days and weeks. As always, thank you for being part of our school community.

Sincerely,

Michele L. Rose, MEd, SDL

Preschool Director

Kim DeBruin, MSOTR/L

Program Director
